

# ANTI VIRUS EXCEPTIONS & EXCLUSIONS FOR CFP WINMAN SOFTWARE

CFPwinMan Support Sheet updated 10/07/17 Page: 1 of 6

---

For CFP winMan software to run effectively, and to prevent Anti Virus programmes from quarantining our files and folders we recommend that you or your IT Company set Exceptions from the Virus scanning, so that CFP files and folders are not included in any Virus Scanning, On Access Scanning and Real Time File Scanning.

The locations to exclude are:

C:\Winman32 and/or C:\Winman32SQL  
C:\SYSCODE32.INF  
C:\Windows\System32 – any files beginning with CFP  
C:\Windows\SYSWOW64 - any files beginning with CFP  
Network Drive\Winman32 folder & all sub-folders & files.

Please Note: Some Anti Virus products may require you to exclude each .exe file separately as bulk exclusion may still result in the files being quarantined.

You may need to apply these exceptions to the server machine as well as any affected workstations.

The below is a list of CFP files to exclude:

*Please note this list is not exhaustive, as new components may be added in new versions. In addition, the list may contain files you do NOT have present as they relate to specific add on modules, plus some files may no longer be present in later versions as the software is updated.*

*If you are running a 64 bit version of Windows you will have a SysWOW64 folder, if you have a 32 bit version of Windows you will have a folder called System32 instead, so the below paths would read C:\Windows\System32\CFPAcnt.EXE for example*

C:\Windows\SysWOW64\CFPAcnt.EXE  
C:\Windows\SysWOW64\CFPAgencyFees.exe  
C:\Windows\SysWOW64\CFPAgencyFees2.exe  
C:\Windows\SysWOW64\CFPAsserta.exe  
C:\Windows\SysWOW64\CFPAutoBanking.dll  
C:\Windows\SysWOW64\CFPAutoLetters.ocx  
C:\Windows\SysWOW64\CFPAXNeg.EXE  
C:\Windows\SysWOW64\CFPBankRec.exe  
C:\Windows\SysWOW64\CFPBrochureOrdering.exe  
C:\Windows\SysWOW64\CFPButton.dll  
C:\Windows\SysWOW64\CFPCalculatedDates.exe
